

MILLIONS OF GALLONS OF WATER ARE SAVED EVERYDAY

WITH PROFILE METAL NOZZLES

- Improves Distribution Uniformity • Eliminates Donuts and Dry Spots
- Saves Water and Energy • Enhanced Stewardship of the Environment

In independent testing, Profile Solid Metal Nozzles have been proven to significantly save water and energy.* Superintendents who have switched to Profiles report reducing run times 20 to 40 percent, while saving thousands of gallons of water every week. Reduced run times also mean less pump and energy costs. Switch to Profiles . . . they'll pay for themselves in water and energy savings!

* Center for Irrigation Technology, California State University, Fresno

Before Profile Nozzles

Dry spots appear when DU is poor and coverage is inconsistent.

After Profile Installation

Profile Nozzles help courses cut back on water use while improving turf health.

Complete Range of Profile Nozzles for Toro and Rain Bird

- For Rain Bird and Toro Heads, 1 ¼" and 1 ½' Inlets
- Replacement sets include full-circle, mid-range and close-in coverage
- Solid brass construction with stainless steel outlets

Now California Golf Courses Can Qualify For Profile Rebates

Take advantage of California's Profile rebates, which can cover the cost of the nozzles, You'll use water more efficiently, lower irrigation run times and see improved turf health. Go to <http://socalwatersmart.com/index.php/outdoor-products>. Click on Large Rotary Nozzles and see Profile Nozzles listed. Go to Make a Reservation and set up a Commercial Account. Follow the steps to complete the reservation and qualify for the rebate.

"Profiles paid for themselves..."

"We are in the midst of a three-year drought, but since installing Profile nozzles, we are actually saving water and estimate that we are using 25 to 30 percent less because of improved DU. The Profile nozzles paid for themselves in water, energy and labor savings."

*Mark Semm, Superintendent
The Clubs of Cordillera Ranch*
